

EUC Project Process – 2024

(Based on EUC Project Architecture – 2023)

Iteration-2

2A	2B	2C
Database	Server App	Client App

2A – Database

- (1) Design ER
- (2) Synchronize ER
- (3) Sample Data
- (4) Sample Queries

2A – Database	2B – Server App	2C – Client App
1 2 3 4		

2B – Server App

- (1) Entity Generation
- (2) Relationship Adjustments (Eager Loading, Loop Blocks)
- (3) Define Regexes
- (4) Define DAO Implementation
- (5) Define Controller (Dao Injection, Define User Authorities.)
- (6) GET – Full
- (7) GET – List
- (8) GET – List (Supportive)
- (9) GET – List (Filters-Form)
- (10) GET – Regexes
- (11) POST
- (12) PUT
- (13) DELETE

2A – Database	2B – Server App													2C – Client App
	1	2	3	4	5	6	7	8	9	10	11	12	13	

2C– Client App

- (1) Logging UI Modification
- (2) Dashboard UI Modification
- (3) Main Window UI Modification
- (4) Entity Generation
- (5) Service Implementation – Full
- (6) Service Implementation – List (Supportive, Form Filters)
- (7) Create Relevant Module
- (8) Add to Side Navigation (With Security Implementation)
- (9) Add to Router Module
- (10) View All
- (11) View Selected (Client Search)
- (12) View Selected (Server Search)
- (13) Add
- (14) Update
- (15) Delete
